

MWRA Valve Exercising Program 2017 Brookline

MWRA Annual Maintenance Program

During the month of **May 2017**, MWRA personnel will perform valve exercising maintenance work on various MWRA water mains, including MWRA Section 76, Section 96, and the Fisher Hill lines (see map). This maintenance work is not expected to cause any pressure losses, however it could create discolored water, which may be anticipated for three (3) days after the work is completed.
